Summary

I'm a product designer with 4 years of experience in web and mobile apps. I love creating designs that are simple, easy to use, and actually help people. My focus is always on understanding what users need and turning that into something functional and visually appealing.

I'm very easygoing and enjoy working with different teams, from developers to product managers. I believe good design comes from good teamwork, so I always try to keep communication open and make sure everyone is on the same page.

I've worked on many different projects, from task management apps to e-commerce and business tools. No matter the project, my goal is to create designs that not only look good but also make users' lives easier. I also love learning and improving, always looking for ways to make my designs better and more user-friendly.

Education

B.E. in Mechanical Engineering

Balikesir, Turkey

University of Balikesir

- Maintained a 3.5/4 GPA, earning scholarships and academic awards.

Work Experience

UX/UI Designer

Istanbul, Turkey

MooSoft IT

Oct. 2024 - Feb. 2025

- Designed the Moomenu admin panel and mobile app to improve restaurant management and customer experience.
- Researched business owners, staff, and customers needs to create user-friendly solutions.
- Created an intuitive menu management system, making it easy for owners to update items without technical help.
- Developed a simple and clear expense and stock tracking system to help businesses monitor finances and inventory.
- Designed a loyalty system Parapuan that encouraged customer engagement and repeat visits.
- Improved the mobile apps ordering process, making it faster and easier for customers.
- Collaborated with developers to ensure smooth implementation of UX flows.
- Tested and refined designs based on real user feedback to improve usability.
- Simplified complex processes into easy-to-use features, reducing training time for businesses.
- Balanced business needs and customer expectations to create a practical and engaging experience.

UX Designer

Istanbul, Turkey

NTT Data Business Solutions

Feb. 2024 - Oct. 2024

- Worked as a UX Designer in the Innovation Team at NTT DATA Business Solutions, focusing on both client and internal projects
- Worked on the ESG project in collaboration with BTS partners, focusing on environment, social responsibility, and corporate governance to help businesses achieve sustainability goals.
- Designed user-friendly interfaces for ESG reporting, making it easier for companies to track and manage their sustainability efforts.
- Contributed to the Xpens project, a detailed expense management panel designed to help businesses track, manage, and analyze financial data.
- Improved user experience by teaming up with process engineers to make workflows smoother and easier to use.
- Led UX work in later project stages, making sure designs improved based on business needs and user feedback.
- Collaborated with designers from different teams, sharing tasks and keeping projects moving forward.
- Helped build a strong UX culture by suggesting improvements and refining design processes.
- Designed user-friendly interfaces by researching best UX/UI practices and applying them to real projects.
- Created wireframes, prototypes, and final designs, making sure everything looked good and worked well.
- Worked closely with developers and stakeholders to turn ideas into practical solutions.
- Managed multiple tasks in an agile environment, adapting to changing priorities and business needs.

UX/UI Designer

Istanbul, Turkey

Codelisa Development Studio

Jun. 2022 - Jan. 2024

- Worked remotely as a UI/UX Designer at Codelisa Development Studio, designing web and mobile interfaces for international and domestic projects.
- Designed clear and simple UI for "Tiktak Time" (Version 2), a mobile work-tracking app for a German client, making it easy to use for employees of all ages and backgrounds.
- Created user flows and visual supports, ensuring a smooth and intuitive experience.
- Developed mobile screens with a clean and non-distracting UI, focusing on usability.
- Presented designs in client meetings, explaining the project vision and improvements.
- Worked on the "Nodelisa" project, a textile CRM mobile app, solving complex table display issues on mobile screens.

Projects

Everreach Task Management App

2023

- Designed a Task Management App to help teams and individuals stay organized by tracking, assigning, and managing tasks easily.
- Talked to project managers, freelancers, and employees to understand their struggles and what they needed in a task app.
- Created simple user personas to make sure the app worked well for different types of users.
- Built a custom task board with clear visuals so users could easily see and organize their work.
- Kept the design simple and easy, using colors and drag-and-drop features to make task management smooth.
- Designed a team dashboard so managers could assign tasks, track progress, and communicate in one place.
- Made different user flows for individuals and teams to keep things clear and efficient.
- Checked out other task apps to see what worked and what didn't, making sure this app was useful but not complicated.
- Created and tested prototypes, improving the design based on real user feedback.

EV Charging Station Mobile App

2021

- Designed an EV Charging Station mobile app for e-car owners, focusing on making it easy to find charging stations and manage the charging process.
- Created a simple, user-friendly interface using iOS design guidelines to ensure a smooth and intuitive experience.
- Built a station search feature that allows users to find charging stations with important details like availability, location, and pricing.
- Added a reservation system for users to book charging slots in advance, ensuring they never have to wait.
- Designed a real-time charging tracker so users can monitor their car's charging progress through the app.
- Developed a wallet system within the app for users to manage payments and store their payment details securely.
- Optimized the app to be quick, easy, and reliable, making the charging experience as convenient as possible for e-car owners.
- Worked on the overall user flow, ensuring all features were easy to access and understand, with a seamless experience from start to finish.
