Summary

Highly skilled and detail-oriented Front-End Developer with **5 years plus** experience in designing, developing and maintaining dynamic, responsive and user-centric web applications. Proficient in modern front-end technologies including **React.js**, **TypeScript**, **JavaScript (ES6+)**, **HTML5** and **CSS3** with a strong focus on creating seamless and engaging user experiences. Expertise in state management libraries such as **Redux**, **Context API** and **React Query**. As well as integrating **RESTful APIs** and **GraphQL** for efficient data handling. Demonstrated ability to collaborate effectively with cross-functional teams including designers, back-end developers, and product managers to deliver high-quality solutions in **Agile** and **Scrum** environments. Skilled in performance optimization techniques such as **lazy loading**, **memoization** and **code splitting** to ensure fast and efficient applications. Experienced in building reusable component libraries and design systems to maintain consistency and scalability across projects. Passionate about accessibility and responsive design with a deep understanding of **WCAG standards** and mobile-first development principles. Adept at writing clean, maintainable and testable code with hands-on experience in unit testing, integration testing and end-to-end testing using tools like **Jest**, **React Testing Library** and **Cypress**. Familiar with modern build tools and workflows including **Webpack**, **Babel**, **Vite** and **CI/CD pipelines**. Committed to continuous learning and staying updated with the latest industry trends, frameworks and best practices. Experienced in mentoring junior developers, conducting code reviews and fostering a culture of collaboration and innovation within development teams.

Highlights Of Qualifications

- Demonstrated expertise in crafting dynamic and interactive web applications with a focus on performance, scalability and maintainability.
- Advanced knowledge of **React.js**, **Next.js** and other modern front-end frameworks to deliver cutting-edge user interfaces.
- Strong command of **TypeScript** and **JavaScript (ES6+)** for enabling the development of robust and type-safe applications.
- Skilled in designing modular and reusable components to streamline development and ensure consistency across projects.
- Proficient in consuming and integrating **RESTful APIs** and **GraphQL** for seamless communication between front-end and back-end systems.
- Adept at implementing responsive and mobile-first designs, ensuring seamless functionality across devices and screen sizes.
- Hands-on experience with end-to-end testing and debugging using tools like **Cypress**, **Jest**, and browser developer tools.
- Familiar with modern development workflows, including Git-based version control, branching strategies and code review processes.
- Deep understanding of web accessibility standards and best practices to create inclusive and user-friendly applications.
- Proven ability to collaborate with UI/UX designers to translate wireframes and prototypes into fully functional web pages.
- Strong background in **Agile** methodologies, participating in sprint planning, daily stand-ups and retrospectives to ensure project success.
- Experience in creating and maintaining design systems and style guides to improve development efficiency and consistency.
- Skilled in implementing secure authentication and authorization mechanisms, including **OAuth** and **JWT**.
- Knowledgeable in using **SASS/SCSS** and **CSS-in-JS** libraries like Styled Components for advanced styling solutions.
- Adept at troubleshooting and resolving complex front-end issues, ensuring smooth user experiences and minimal downtime.
- Passionate about leveraging emerging technologies and frameworks to enhance application functionality and user engagement.
- Strong interpersonal and communication skills, enabling effective collaboration with cross-functional teams and stakeholders.
- Committed to continuous learning and professional growth, staying updated with the latest trends in front-end development and web technologies.

Tumeryk

Sr.Front-End Developer (Contracted)

Toronto, Canada

Mar. 2024 - Apr. 2025

Responsible for optimization of complex, scalable and high-performance web applications. My role required me to collaborate closely with cross-functional teams including product managers, UX/UI designers and backend engineers to deliver seamless and visually appealing user experiences. I was tasked with creating reusable and modular components to implementing advanced state management solutions. Its ensuring the applications adhered to modern web standards including accessibility and cross-browser compatibility. Additionally, I also worked on improving application performance, integrating APIs, and ensuring the successful delivery of projects within Agile workflows while meeting tight deadlines and business objectives.

- Created reusable and modular React.js components to streamline development and ensure consistency across multiple projects.
- Designed and implemented advanced state management solutions using **Redux** and **Context API** to handle complex application workflows.
- Developed and optimized server-side rendering (**SSR**) with **Next.js** to improve **SEO** performance and reduce page load times.
- Created dynamic and interactive dashboards using **D3.js** and **Chart.js** for real-time data visualization and analytics.
- Integrated **RESTful APIs** and GraphQL endpoints to enable seamless communication between the front-end and back-end systems.
- Built pixel-perfect, responsive user interfaces by translating high-fidelity wireframes and prototypes into functional components.
- Improved application performance by implementing lazy loading, code splitting and caching strategies and its reducing load times by 50%.
- Conducted accessibility audits and implemented **WCAG-compliant** features to ensure inclusivity for all users.
- Automated testing processes using **Jest**, and **Cypress** to ensure the reliability and stability of the application.
- Migrated legacy codebases to modern frameworks to improving maintainability and scalability of the applications.
- Led code reviews and provided constructive feedback to ensure adherence to coding standards and best practices.
- Mentored junior developers by providing technical guidance, conducting knowledge-sharing sessions and fostering a collaborative team environment.
- Designed and implemented reusable design systems and component libraries to maintain consistency across projects.
- Integrated third-party authentication systems using **OAuth2** and **JWT** to enhance application security.
- Debugged and resolved complex front-end issues to improving user satisfaction and application reliability.
- Conducted A/B testing and user behavior analysis to optimize user interfaces and improve engagement metrics.
- Automated CI/CD pipelines using **Jenkins** and **GitHub Actions** to streamline the deployment process.
- Collaborated with QA teams to identify and resolve bugs during the testing phases and its ensuring a smooth release process.
- Improved cross-browser compatibility by testing and resolving inconsistencies across major browsers and devices.
- Created detailed technical documentation for components, workflows and best practices to support team collaboration.
- Participated in **Agile** ceremonies, including sprint planning, daily stand-ups and retrospectives to ensure timely delivery of features.
- Integrated AI-driven features, such as predictive analytics and chatbots, into web applications to enhance user experiences.
- Reduced technical debt by refactoring outdated code and introducing modern development practices.
- Stayed updated with emerging front-end technologies and trends for incorporating them into projects to maintain a competitive edge.
- Delivered high-quality, scalable, and user-centric web applications under tight deadlines while maintaining a strong focus on performance and usability.

MooSoft Information Technologies

Project Manager/Sr.Front-End Developer (Full-Time)

Istanbul, Turkey

Jul. 2024 - February. 2025

Responsible for overseeing the end-to-end development of web applications while managing project timelines, resources and deliverables. My role required me to balance technical leadership with project management responsibilities including defining project requirements, coordinating with stakeholders and ensuring alignment with business objectives. I worked closely with cross-functional teams to design and implement responsive, user-friendly interfaces while ensuring the successful execution of front-end development tasks. Additionally, I facilitated Agile ceremonies, mentored team members and ensured the delivery of high-quality solutions that met both technical and business needs. I also played a key role in identifying and mitigating risks, resolving technical challenges and fostering a collaborative team environment.

- Managed end-to-end project lifecycles, ensuring timely delivery of CRM and web applications.
- Created detailed project roadmaps, timelines, and resource plans to ensure the successful delivery of web applications.
- Designed and developed responsive user interfaces using React.js and its ensuring a seamless user experience across devices.
- Built reusable and modular components to improve development efficiency and maintain consistency across projects.
- Integrated RESTful APIs and third-party services to enable seamless communication between front-end and back-end systems.
- Conducted code reviews to maintain high-quality standards and mentor team members on best practices.
- Implemented advanced state management solutions using Redux to handle complex workflows and data flows.
- Optimized application performance by implementing caching strategies, lazy loading and code splitting techniques.
- Collaborated with UX/UI designers to deliver user-friendly and visually appealing interfaces that aligned with business goals.
- Automated testing processes using Jest and Cypress to improve application reliability and reduce manual testing efforts.
- Created detailed project documentation to ensure alignment between stakeholders and development teams throughout the project lifecycle.
- Resolved technical challenges by providing innovative solutions to meet project requirements and deadlines.
- Led Agile ceremonies, including sprint planning, daily stand-ups and retrospectives to ensure timely delivery of features and foster team collaboration.
- Created dynamic dashboards and reporting tools for real-time analytics to improving decision-making processes for stakeholders.
- Improved cross-browser compatibility and accessibility by adhering to WCAG standards and conducting thorough testing.
- Delivered high-quality applications under tight deadlines while maintaining a strong focus on user experience and performance.
- Fostered a collaborative team environment by promoting knowledge sharing, continuous improvement and open communication.

Responsible for building and maintaining web applications with a strong focus on delivering responsive, user-friendly interfaces. My role involved implementing front-end features, debugging issues and ensuring the seamless integration of APIs with the back-end systems. I worked closely with designers and backend developers to deliver high-quality solutions while adhering to best practices in front-end development. Additionally, I contributed to improving application performance, ensuring cross-browser compatibility and staying updated with emerging technologies to enhance the overall development process.

- Developed responsive web interfaces using HTML5, CSS3, and JavaScript.
- Created responsive and visually appealing web interfaces using HTML5, CSS3, and JavaScript to enhance user experiences.
- Built reusable components with React.js to improve development efficiency and maintain consistency across projects.
- Integrated RESTful APIs to enable seamless communication between the front-end and back-end systems.
- Created pixel-perfect interfaces by translating wireframes and design mockups into functional components.
- Conducted unit testing using Jest to ensure application stability and reliability.
- Optimized web applications for performance and scalability and its reducing load times by 25% through code optimization techniques.
- Ensured cross-browser compatibility and adherence to accessibility standards by conducting thorough testing and implementing fixes.
- Debugged and resolved front-end issues, improving application functionality and user satisfaction.
- Participated in Agile development processes, including sprint planning, daily stand-ups, and retrospectives, to ensure timely delivery of features.
- Used Git for version control and collaborated with team members on code reviews to maintain code quality.
- Created responsive designs using frameworks like Bootstrap and Material-UI to enhance usability across devices.
- Documented front-end workflows, best practices and technical specifications to support team collaboration and onboarding.
- Improved SEO performance by optimizing meta tags, page structure and load times to enhance search engine rankings.
- Stayed updated with emerging front-end technologies and applied them to projects to improve development processes and outcomes.

Education

Intensive English Program

ILAC Toronto, Canada
Oct. 2024 - Apr. 2025

- Completed an intensive English program, achieving a high level of proficiency in reading, writing, and speaking.
- Participated in cultural exchange activities to enhance language skills and cultural understanding.

B.E. in Mechanical Engineering

University of Balikesir Balikesir, Turkey
Jun. 2020 - Sep. 2024

- Maintained a 3.5/4 GPA, earning scholarships and academic awards.

Certificates

2025	High-Advanced English
2024	Flutter & Dart - The Complete Guide
2021	MERN Stack Development
2020	JavaScript Programming
2020	Advancd HTML & CSS Training Kit
