Education

B.E. in Mechanical Engineering

UNIVERSITY OF BALIKESIR

- Maintained a 3.5/4 GPA, earning scholarships and academic awards.

Balikesir, Turkey

Jun. 2020 - Sep. 2024

Work Experience

Project Manager/Full-Stack Developer

MOOSOFT

- Managed Design, Frontend, Backend, and DevOps teams to ensure a seamless and synchronized workflow for a large-scale software project.
- Transitioned all technologies to **JavaScript** to ensure efficient and synchronized system performance across the stack.
- Implemented **Docker** and **Kubernetes** to establish a modular and scalable infrastructure.
- As a result of the updates, the user base increased sevenfold within three months, and in-app transaction volume reached **a million USD**.

Istanbul, Turkey

Jul. 2024 - February. 2025

Front-End Developer

CODELISA DEVELOPMENT STUDIO

- Developed advanced SEO-friendly applications using **React**, **NextJS**, and **TypeScript**, prioritizing seamless data flow within the software for the European market.
- Integrated socket communications, complex map paths, and data-driven state management using **React Native** and **Redux**.
- Optimized in-app data flow and resolved type circulation issues, resulting in a 23% performance improvement, a 30% faster development process, and the creation of sustainable applications.

Istanbul, Turkey

May. 2023 - Aug. 2024

Front-End Developer

KUASAR VIDEO

- Built high-performance, high-traffic projects using **React**, **NextJS**, and **TypeScript** for an AI-powered application that scores social media videos for content creators and businesses.
- Utilized WebSockets to actively deliver real-time video processing data to users during application analysis.
- Conducted stress and end-to-end (**E2E**) testing on React projects using **Jest** and **Mocha** to identify performance and functionality issues.
- Achieved a performance score increase from 20% to 93% by cleaning bloated code, optimizing data flow structures, and fixing UI library integrations.

Istanbul, Turkey

Jun. 2022 - Mar. 2023

Front-End Developer

APERION GAMING

- Developed web-based interactive games, including UFO Galaxy and Rock, Paper, Scissors, using **ReactJS** and complex **WebSocket** integrations.
- Performed Unit, E2E, and Regression tests using **JEST** to identify bugs. Collaborated with Backend and DevOps teams to resolve errors caused by high data traffic and ensure smooth operation.
- Reduced code size by optimizing data flow using **TypeScript**. Integrated Lazy Load and useMemo structures, resulting in a 45% performance improvement on the UI side and a 400MB reduction in **Docker** container size.
- Increased the system's concurrent player capacity from 3,000 to 10,000+ (approximately 300% growth) through code splitting, data flow optimization, bug fixing, and the implementation of scalable **microfrontend** architectures.

Valetta, Malta

Jun. 2021 - Mar. 2022

React Developer

GEON IT

- Worked on GIS (Geographic Information Systems) integration for a responsive Map Client built with QWC2 (open-source), **ReactJS**, and **OpenLayers**, focusing on efficient data flow.
- Developed new components to enhance functionality, emphasizing code splitting for improved performance.
- Integrated complex GIS data (over a million records) into the OpenLayers system, ensuring accurate and optimized display within the Latitude and Longitude bounding box.
- Improved rendering performance by 25% in a high-data rendering system by leveraging **React**'s useRef, useMemo, useCallback, and lazy structures.

Balikesir, Turkey

May. 2020 - Jun. 2021

Certificates

- 2024 **Flutter & Dart - The Complete Guide**, Udemy Co.
- 2021 **MERN Stack Development**, Udemy Co.
- 2020 **JavaScript Programming**, Udemy Co.
- 2020 **Advanced HTML & CSS Training Kit**, Udemy Co.
