Summary

Experienced Full-Stack Developer with over 4 years of expertise in designing and developing scalable web applications. Highly proficient in modern front-end technologies, including ReactJS, NextJS, and TypeScript, as well as backend development with Node.js, ExpressJS, and Sequelize. Skilled in microfrontend architecture, real-time data handling with WebSockets, and RESTful API development. Adept at optimizing applications for performance, security, and scalability. Strong advocate for clean code, best practices, and maintainable architecture, ensuring long-term project sustainability.

Beyond coding, I have hands-on experience in DevOps, utilizing tools like Docker, Jenkins, and Redis to streamline CI/CD pipelines and enhance deployment efficiency. I thrive in cross-functional teams, collaborating closely with designers, backend engineers, and product managers to deliver seamless user experiences. Passionate about problem-solving and always eager to explore new technologies, I strive to build innovative solutions that bridge the gap between usability and technical excellence.

Work Experience

MooSoft

Istanbul, Turkey

PROJECT MANAGER/FULL-STACK DEVELOPER

Jul. 2024 - February. 2025

- Led a team of developers to ensure seamless transition from design to production for large-scale software projects.
- Designed and developed high-performance CRM systems, integrating secure payment gateways.
- Architected and maintained microfrontend systems, enhancing modularity and scalability.
- Implemented DevOps best practices using Docker, GitLab, and CI/CD pipelines.

Codelisa Development Studio

Istanbul, Turkey

FRONT-END DEVELOPER

May. 2023 - Aug. 2024

- Developed responsive web applications using ReactJS, NextJS, and TypeScript.
- Worked extensively on React Native projects, integrating socket communication, complex map paths integration and state management using Redux.
- Improved project performance by implementing code optimizations and best practices.
- Worked in Agile teams, ensuring seamless collaboration between developers and designers.
- Optimized application performance, significantly improving app responsiveness and reducing load times.

Kuasar Video

Istanbul, Turkey

FRONT-END DEVELOPER

Jun. 2022 - Mar. 2023

- Designed and developed interactive web applications with React.js and Next.js.
- Implemented real-time video streaming components for enhanced user engagement.
- Ensured cross-platform compatibility through rigorous testing and debugging.
- Boosted web app performance by reducing initial load times by 50%.

Aperion Gaming

Valetta, Malta

FRONT-END DEVELOPER

Jun. 2021 - Mar. 2022

- Developed an interactive web-based multiplayer game using React.js and WebSockets.
- Designed real-time communication features, enabling seamless gameplay for 5,000+ concurrent users.
- Optimized backend data flow, reducing latency and improving game responsiveness by 40%.
- Ensured smooth cross-browser gaming experience with extensive testing and debugging.

GEON IT

Balikesir, Turkey

REACT DEVELOPER

May. 2020 - Jun. 2021

- Built scalable front-end systems using React, Redux, and modern CSS frameworks.
- Developed reusable UI components to improve development efficiency.
- Participated in Agile workflows, delivering consistent updates and new features.
- Optimized app performance, reducing API call response times by 60%.
