Summary

Experienced and results-driven **Senior UX/UI Designer** with **over 5 years** of expertise in designing and improving complex digital systems including **CRM, SaaS** and **RMS** platforms. Specialized in creating intuitive and user-centered designs that enhance usability, streamline workflows and drive business success. Adept at leading the **end-to-end design process** from **user research** and **wireframing** to **prototyping, usability testing** and **high-fidelity design implementation**. Proficient in leveraging **data-driven design strategies** and **user behavior analysis** to identify pain points and deliver impactful solutions. Skilled in developing and maintaining **scalable design systems** to ensure consistency across platforms. Passionate about **accessibility standards (WCAG)** and **inclusive design principles** and its ensuring equitable experiences for all users. Known for collaborating effectively with **cross-functional teams** including product managers, developers and stakeholders to align design solutions with business objectives and technical constraints. Strong expertise in **improving UX** for enterprise-level systems, optimizing **user flows** and simplifying complex processes to enhance productivity and user satisfaction.

Highlights Of Qualifications

- Proven expertise in the end-to-end design process including user research, wireframing, prototyping, usability testing and high-fidelity design implementation.
- Experience designing for **enterprise applications**, SaaS platforms and **e-commerce solutions** with a focus on scalability and usability.
- Skilled in designing intuitive **user interfaces** and **interaction flows** that enhance usability and drive user engagement.
- Proficient in industry-standard design tools such as **Figma, Sketch** and **Adobe XD**.
- Strong background in user research methodologies including **user interviews, surveys, persona development** and **journey mapping** to inform design decisions.
- Adept at conducting **usability testing** and leveraging **A/B testing** and **analytics tools** (e.g., **Google Analytics**) to optimize user experiences.
- Extensive experience in developing and maintaining **design systems** and **component libraries** to ensure consistency across products and platforms.
- Deep understanding of **WCAG standards, accessibility testing** and inclusive design principles to create equitable experiences for all users.
- Experienced in collaborating with **cross-functional teams** including product managers, developers, and stakeholders to align design solutions with business goals and technical constraints.
- Strong ability to work in **Agile** environments for iterating on designs based on feedback and adapting to evolving project requirements.
- Passionate about leveraging **human-centered** design principles and **emerging technologies** to craft impactful digital products.
- Skilled in facilitating **design workshops, brainstorming sessions** and **design critiques** to foster collaboration and innovation within teams.
- Familiarity with front-end technologies (**HTML, CSS, JavaScript**) to ensure seamless collaboration with development teams.
- Demonstrated ability to balance **user needs, business objectives** and **technical feasibility** to deliver high-quality design solutions.
- Strong communication and presentation skills with the ability to articulate design concepts, rationales and solutions to stakeholders at all levels.
- Knowledge of **motion design, micro-interactions** and **data visualization** to enhance user experiences.
- Passionate about staying ahead of industry trends and continuously improving design processes to deliver innovative solutions.

Mid-Level UX/UI Designer (Full-Time)

Istanbul, Turkey

Feb. 2024 - Jan. 2025

Responsible for leading the end-to-end design process, from research and ideation to prototyping and final implementation, ensuring that all solutions were user-centered and aligned with business objectives. I collaborated closely with cross-functional teams including product managers, developers, and stakeholders. For define and deliver intuitive, accessible and visually engaging digital experiences. My role involved conducting extensive user research, usability testing and data analysis to gather insights and validate design decisions. I developed and maintained design systems to ensuring consistency and scalability across platforms while adhering to accessibility standards such as WCAG. Additionally, I facilitated workshops, design sprints and brainstorming sessions to align teams on project goals and foster innovation. I was also responsible for creating wireframes, prototypes and high-fidelity mockups using tools like Figma and Sketch to ensuring seamless handoffs to development teams.

- Designed and implemented a comprehensive **design system** to ensure consistency across web and mobile platforms.
- Conducted in-depth **user research** and **usability testing** to identify pain points and improve user satisfaction.
- Created wireframes, prototypes and high-fidelity designs for complex enterprise applications to ensuring alignment with business goals.
- Collaborated with developers to ensure **pixel-perfect implementation** of designs and adherence to **accessibility standards**.
- Facilitated **design sprints** and **workshops** to align stakeholders and generate innovative solutions.
- Advocated for **user-centered** design principles across the organization to influencing product strategy and development.
- Conducted **A/B Testing** and **data analysis** to optimize user flows and improve conversion rates.
- Developed **user personas**, **journey maps** and service blueprints to guide design decisions.
- Partnered with marketing teams to ensure brand consistency across all digital touchpoints.
- Led the redesign of a high-traffic e-commerce platform to resulting in a significant increase in user engagement.
- Created **interactive prototypes** to communicate design concepts and gather stakeholder feedback.
- Integrated qualitative and quantitative research insights into the design process to inform decisions.
- Championed accessibility by ensuring all designs met **WCAG compliance standards**.
- Presented design concepts and rationale to executive stakeholders for securing buy-in for key initiatives.
- Mentored junior designers to providing guidance on best practices and professional development.
- Conducted competitive analysis to identify opportunities for innovation and differentiation.
- Designed intuitive **dashboards** and **data visualization** tools for enterprise users.
- Collaborated with analytics teams to measure the impact of design changes on **user behavior**.
- Streamlined the design-to-development workflow by implementing clear documentation and guidelines.
- Partnered with product managers to define feature requirements and prioritize design efforts.
- Improved the onboarding experience for new users to reducing drop-off rates.
- Conducted heuristic evaluations to identify usability issues and propose solutions.
- Designed **responsive** interfaces that provided seamless experiences across devices.
- Advocated for **iterative design** processes to incorporating feedback from multiple stakeholders.

MooSoft Information Technologies

Mid-Level UX/UI Designer (Full-Time)

Istanbul, Turkey

Mar. 2022 - Jan. 2024

Responsible for designing and delivering user-friendly interfaces and experiences that aligned with both user needs and business objectives. I worked closely with product managers, developers and other designers to create wireframes, prototypes and high-fidelity mockups that effectively communicated design concepts. My role involved conducting user research, usability testing and competitive analysis to inform design decisions and improve user satisfaction. I also contributed to maintaining and evolving the design system to ensuring consistency and scalability across projects.

- Designed end-to-end user experiences for web and mobile applications to ensuring that solutions were intuitive, engaging and aligned with user needs.
- Conducted usability testing to validate design decisions for leading to improved user satisfaction and reduced friction points.
- Created wireframes, prototypes and high-fidelity designs using Figma for effectively communicating design solutions to stakeholders.
- Collaborated with product managers and developers to align design solutions with business goals and technical constraints for ensuring feasibility and impact.
- Presented design concepts to stakeholders for incorporating their feedback into iterative improvements that enhanced the final product.
- Developed and maintained a scalable design system to ensuring consistency and efficiency across multiple projects.
- Researched user behavior and industry trends to inform design strategies for resulting in innovative and competitive solutions.
- Optimized navigation flows and interaction patterns to improving usability and reducing user frustration.
- Advocated for accessibility standards and inclusive design principles to ensuring that products were usable by a diverse audience.
- Facilitated workshops and brainstorming sessions for generating creative ideas and fostering collaboration among team members.
- Analyzed user feedback and data to identify pain points for informing design decisions and improving user engagement.
- Documented design specifications for seamless handoff to development teams for ensuring accurate implementation of designs.
- Mentored junior designers to sharing best practices and providing guidance that enhanced their skills and contributions.
- Implemented iterative design processes to test and refine solutions for ensuring that designs met user needs and business objectives.
- Collaborated with international clients to deliver tailored design solutions that addressed diverse user needs and cultural contexts.
- Created interactive prototypes to demonstrate user flows and interactions for facilitating stakeholder alignment and user testing.
- Improved app usability by addressing user pain points and feedback to increasing user satisfaction and retention.
- Managed multiple projects simultaneously to meeting tight deadlines and delivering high-quality designs.

Codelisa Development Studio

UX/UI Designer (Full-Time)

Istanbul, Turkey

Feb. 2020 - Jan. 2022

Responsible for creating user-centered designs that enhanced usability and aligned with business goals. I collaborated with cross-functional teams to design wireframes, prototypes, and high-fidelity mockups that effectively communicated design concepts. My role also involved conducting user research and usability testing to gather insights and improve the overall user experience.

- Assisted senior designers in creating wireframes and prototypes to effectively communicating design concepts and ensuring alignment with project objectives.
- Collaborated with cross-functional teams including developers and product managers to ensure that design solutions met both user needs and technical constraints.
- Conducted user research through surveys, interviews and usability testing to gathering actionable insights that informed design decisions and improved user satisfaction.
- Created high-fidelity mockups using tools like Figma to ensuring that designs were visually appealing and aligned with branding guidelines.
- Participated in design reviews and incorporated feedback from stakeholders to enhancing the quality and usability of the final designs.
- Supported the development team by providing detailed design assets and specifications to ensuring accurate implementation of designs.
- Tested prototypes with users to validate design assumptions for leading to iterative improvements and more intuitive user experiences.
- Documented design decisions and maintained organized project files for streamlining collaboration and ensuring consistency across the team.
- Learned and applied accessibility standards (e.g., WCAG) to create inclusive designs that catered to a diverse user base.
- Improved navigation flows and interaction patterns based on user feedback for reducing friction points and enhancing usability.
- Researched industry trends and emerging technologies to stay updated on best practices to introducing innovative design solutions.
- Contributed to the creation of a design system to ensuring consistency and scalability across multiple projects.
- Analyzed user behavior data to identify pain points and proposed solutions that improved user engagement and retention.
- Communicated design ideas effectively to team members and stakeholders for facilitating alignment and buy-in for proposed solutions.
- Participated in brainstorming sessions to generate creative design ideas for contributing to innovative and user-centered solutions.
- Optimized existing designs by addressing user feedback to enhancing overall user satisfaction and usability.
- Worked closely with developers to ensure that designs were implemented accurately and met quality standards.
- Created user personas to better understand target audiences for informing design decisions and improving user empathy.

Education

B.E. in Mechanical Engineering

University of Balikesir

Balikesir, Turkey

Sep. 2020 - Jun. 2024

- Maintained a 3.5/4 GPA, earning scholarships and academic awards.
